

## JOURNAL N°2— “Shadow as material”

*“Light is not what we see — it is what reveals the invisible.” — thought of the day*

### MATERIAL

Wood: rough, cut by hand  
Sunlight: moving, ungraspable  
Rope: flexible  
Shadow: not drawn, but cast  
Edges: sharp one moment, blurry the next

### TOOLS

Scale model 1:10  
Time  
The sun itself

*“We do not control the light. We shape what lets it pass.”*

### GESTURE

Cut . Place . Wait . Observe . Reposition . Notice . Photograph . Let go .

### REFLECTION

The test was not for the object, but for the light around it.  
A shadow does not belong to a form. It belongs to the moment.  
We learned that space is made not only of volume, but also of passing light and temporary presence.
